for the record
NEWBILT machinery

Duplex

Semi automatic record pressing system

Two presses and one extruder form the main Duplex configuration. Choose the setup that suits your production, from a single press to a two press system with two extruders.

Main Duplex configuration | 2 presses + 1 extruder

Record formats and creative finishes

12 inch · 10 inch · 7 inch
Solid colours, splatter, marble, half and half, and picture discs.

Available configurations

Configuration	Presses	Extruders
Single	1	1
Duplex main configuration	2	1
Duplex with two extruders	2	2

The two press / two extruder option operates as one system with shared control and one hydraulic unit.

Hydraulic supply

A matching hydraulic unit is normally supplied with a standalone system. An external or larger central hydraulic supply is also possible, allowing several systems to share one hydraulic source.

Separate edge trimming

The NEWBILT edge trimmer is available separately. Customers can also source a trimmer from another manufacturer.
