EX 35

Auxiliary extruder for colour effects and special records

The compact NEWBILT EX 35 works alongside the main extruder to add a second or third colour in vinyl record production. It is designed specifically as an auxiliary extruder for colour effects and special records.

PVC screw and thermal control

Specially designed 35 mm screw for PVC, with three heating zones and two fans.

Variable screw speed

A frequency controller regulates the extruder screw speed.

PVC strand output

The standard version produces PVC strands for use in colour effects and special record production.

Touchscreen operation and online support

Touchscreen HMI following the NEWBILT equipment standard. Prepared for NEWBILT online support, as with the Duplex and Classic systems.
