Edge Trimmer

Record edge trimming for 7 10 and 12 inch formats

The NEWBILT edge trimmer removes excess material from the edge of a pressed record, trimming it to its final diameter. Use it as a standalone machine or connect it to your NEWBILT system.

Heated cutting blade

Hardened, heated blade with freely adjustable temperature control.

Three record sizes

7 inch · 10 inch · 12 inch
The corresponding trimming plates are available to purchase separately for each record size.

Standalone operation

Available as a standalone machine for use with NEWBILT presses or record presses from other manufacturers.

Connection to Duplex or Single

The trimmer can be connected electrically and pneumatically to the NEWBILT extruder. In this configuration, it is integrated into the emergency stop circuit of the Duplex or Single system.

Talk to NEWBILT about your trimming setup
