Label Punch

Semi automatic removal of the record label area

The NEWBILT Label Punch punches out the label area of 7 inch, 10 inch and 12 inch records. Manual loading is followed by automatic transport, punching and collection.

106 mm punch diameter

Punches a 106 mm diameter opening to remove the record label area.

Three record sizes

7 inch · 10 inch · 12 inch
Adjustable for punching out the label area of all three record formats.

Automatic processing after manual loading

Load the record by hand. A slide automatically transports it to the punch. After punching, the record slides automatically into a storage box.

Optional Dinker function

An optional upgrade adds a Dinker function for 7 inch records.
